

# **SAFETY ENGAGEMENT**

## **SAFETY IN AN INTERACTIVE WAY**

Motivational training that can fully replace it boring suspend legal snakes. It builds on Safety Leadership training and development of occupational health and safety culture.

Emphasis on safety and health of workers are often among the core values of companies. Not always but companies doing these values to embrace and build a culture of safety. Top managers have been trained and maybe excited for the idea of a safety culture. But how to transfer this enthusiasm to the whole company?

### **Who is the course for?**

- All employees of the company
- team leaders

### **What will my course?**

- You'll see how psychology works and why our behavior violates the rules
- Participants revealed that the injury is not a coincidence and quite accurately we can predict
  - Why am I getting injured and who is injured?
  - What will be the source
  - Why does not health and safety training as a barrier against accidents
  - What should I do to hurt
- Employees found to improve the culture of safety and to help colleagues with risks
- We will do a lot for your motivation and reveal some deep-rooted sense rules (like why you keep railing way down the stairs, and why it is a completely different sense way up the stairs.)
- We will teach employees to do a risk analysis for the most dangerous activity
- How to get rid of 80% of injuries compliance rules 10
- **Competence in OSH:**
  - Understanding the psychology of safety;
  - Why violate the rules; Who gets hurt, When and Why hurt
  - Motivation, what motivates us, and what discourages.
  - Sense safety rules
